

Digital Workplace

“Transform new way for working”

Building up the safety and innovation transformation

Enhance Data Security

Make sure the right people have access to the right applications and files. This reduces the risk of others being able to see the information they should not see or add other users.

Unification Process

The manual process, which involves many stakeholders and employees, can be quite complex. It needs to be a standardize workflow whose steps follow each other systematically until the same result is achieved every time.

Improve Data Privacy

Companies collect customer data from different business activities. The company is responsible for protecting the privacy of the customer details once it obtains the requisite information.

Easy to Find and Share

Documents are centralized in a simple platform which organized, shared and easily accessed by employees anytime anywhere, regardless of device or region.

More Flexibility and Agility

Digital workplaces offer organizations and their employees flexibility in all areas of their working lives that allows employees to work remotely on any device.

Collaboration with External and Internal Stakeholder

Communication between departments is improved and task completion is tracked more efficiently. Employees will spend less time moving around to communicate with one another, and they can complete tasks more quickly.

Improve Productivity

Save up to 90% searching times by intelligent content search and related result suggestion which cannot be performed by traditional paper filing.

Benefits you can get

Reduce Infrastructure & Maintenance Cost

Cloud storage offers the advantage of reducing the amount of storage space in the office and reducing maintenance and operation costs.

Ensure Data Integrity

By submitting electronic forms while on the field can reduce the amount of time wasted due to communication errors or human error and save the cost.

WHO WE ARE?

ABOUT US

WCL Solutions is a leading IT solutions provider, a digital transformation and outsourcing partner for clients in all industries across the region.

WHAT WE DO?

We are determined to walk through the digital transformation journey with our clients and partners together. Always moving forward to provide the most cutting-edge and reliable technologies in the market to embrace new ideas and new ways of business.
